

# *Precision Breeding Immersive-Course*

BAYER &  
POLITECNICO DI MILANO

# Agenda

## // Frontal Lesson

- // Introduction to Corn breeding

## // Site Visit & on field activities

- // Research planter at work

## // Site Visit & on field activities

- // Drones' flights for data capture

# INTRODUCTION TO CORN BREEDING

Introduction to BAYER and the C.S. Division - focus on EMEA Breeding

*Samuel Atanassiu - Testing Operation Manager & Site Lead Olmeneta*

Product Selection & Advancement

*Linda Zamariola – Product Development Scientist*

Field Testing & Precision Breeding

*Stefano Pietro Bosio – Research Associate*

**Friday, February the 24<sup>th</sup>**

Time: 14:00-16:00

## Learning Objective:

Who we are

What is precision breeding

How we achieve the objective of designing the best

## RESEARCH PLANTER AT WORK

Seed preparation activities

*Silvia Cattagnoli – Research Assistant*

Field Planting Simulation on site

*Marco Rossini – Research Assistant*

*Marco Farina – Research Assistant*

**Friday, March the 3<sup>rd</sup>**

Time: 13:00-17:00

### Learning Objective:

Learn how precision planters work and how planting operations are organized and managed

## DRONES' FLIGHTS FOR DATA CAPTURE

Demonstration on drone's flight

Stefano Pietro Bosio – *Research Associate*

Focus on Data Collection and Analysis

Samuel Atanassiu - *Testing Operation Manager & Site Lead Olmeneta*

Stefano Pietro Bosio – *Research Associate*

**Friday, May the 19<sup>th</sup>**

Time: 13:00-17:00

### Learning Objective:

Learn how drones are used in precision breeding and how data analysis drives decision taking.

# *Thank you!*

**The Olmeneta Breeding Team**
